OMERS

Toronto, ON

- Engineered backend for **Spring Boot** service handling pension plan transfers using **Java** and **Gradle**, integrating **Apache Kafka**, **Apache Camel**, and **Docker**, designing 30+ RESTful APIs serving 500,000+ members.
- Architected 15 database tables, alongside Java entities, and mappers from ERDs using PostgreSQL, leveraging Liquibase and Groovy for implementation across 10+ microservice models and testing across 4+ environments.
- Resolved 10+ critical vulnerabilities reported by Snyk, ensured over 80% SonarQube code coverage, configured 30+ business validations, and designed 100+ JUnit tests across enterprise microservices.

Software Developer Intern

May 2024 - Dec 2024

OPTrust

Toronto, ON

- Automated pension data delivery using Python and PowerShell, processing 30+ files across remote servers daily, reducing manual effort by 60%.
- Trained an **Azure OpenAI** chatbot to engineer automated scripts compatible with job schedulers with a focus on cybersecurity, achieving time and cost savings of over **40**%.
- Designed a CI/CD pipeline by configuring Git runners and GitHub Actions on test Linux servers, enabling SSH into a Windows server for automated test execution.

Software Developer Intern

May 2023 – Aug 2023

Treasury Board Secretariat

Toronto, ON

- Developed 4+ GoLang REST APIs for the backend using SQLx with prepared statements and structs to prevent 3+ SQL injection vulnerabilities and decrease endpoint load times by 6%.
- Enhanced frontend through **Vue.js** by following Accessibility for Ontarians with Disabilities Act (AODA) standards, providing a web-accessible UI/UX reaching 29 Ontario Ministries.
- Debugged 10+ **PHP** files by creating custom PHP WordPress plugins that resolved 4+ site functionality bugs.

Software Engineer Intern

May 2022 - May 2023

Loblaw Companies Limited

Brampton, ON

- Engineered **Spring Boot** microservice using **Java** and **Apache Maven** to calculate GoldenGate replication latency to Oracle through REST APIs and SQL, increasing system latency visibility over **30**%
- Developed **Python** script for **MySQL**, **MongoDB**, and **Postgres** data replication to **Oracle** using REST APIs and queries, achieving inserts for thousands of records in less than 2 seconds
- Implemented CI/CD pipelines using Docker, Jenkins and OpenShift Container Platform, automating the build, test, and deployment process across QA and production environments, reducing deployment time by 40%.

PROJECTS

rXpress Pharmacy Delivery | Java, Spring Boot, Supabase, Next.js, React Native

- Developed **React Native** app for iOS and Android with **Mapbox** GPS tracking, route optimization, **Stripe** payouts, and secure KYC using Supabase Storage and encryption scalable to **100**+ concurrent drivers.
- Built a **Next.js** pharmacy portal with real-time prescription tracking, full **CRUD** functionality for prescription management, prescription analytics, role-based access control, admin management, and driver assignment.
- Designed and developed a central **Spring Boot** orchestrator service managing business workflows across pharmacy, driver, and admin modules, exposing 50+ REST APIs, secured via **JWT** and **PostgreSQL RLS**, with automated **GitHub Actions** CI/CD pipelines deploying to multiple environments.
