Education

Toronto Metropolitan University — Toronto, ON
Bachelor of Science in Computer Science — *Graduated: June 2025*

Experience

Associate Software Engineer — March 2026 – Present
OMERS — *Toronto, ON*

- Design and build new transfer **workflows** on OMERS' internal pension platform in an **Agile** environment with QAs and POs, enabling migration from legacy software and delivering new features for **150+** pension specialists.
- Built an end-to-end test automation framework in **TypeScript** and **React** using **Playwright**, covering **35+** workflows across the microservice ecosystem to support regression coverage.
- Enhanced and maintained services spanning database syncing, document generation, and identity management across the microservice ecosystem, using **Apidog**, **Datadog**, and **GitHub Copilot** to accelerate API design, testing, and observability.

Software Engineer Intern — May 2025 – March 2026
OMERS — *Toronto, ON*

- Engineered and architected the backend for a multi-plan pension transfer application across a **microservices** architecture in **Java** and **Spring Boot**, automating paper-based transfers from external pension plans and auto-initiating internal workflows for **500,000+** members, using Gradle, **Apache Kafka**, **Apache Camel**, and Docker.
- Designed **30+ RESTful APIs** for the transfer platform, and architected 15 database tables, Java entities, and mappers from ERDs using **PostgreSQL**, leveraging **Liquibase** and **Groovy** across **10+** microservice models and 4+ environments.
- Resolved **10+** vulnerabilities through **Snyk**, ensured **80+% SonarQube** code coverage, configured **30+** business validations, designed **100+ JUnit** tests, and built **3+ Datadog** dashboards across enterprise microservices.

Software Developer Intern — May 2024 – Dec 2024
OPTrust — *Toronto, ON*

- Automated data intake using **Python** and **PowerShell** across 30+ files daily, reducing manual effort by **60**%.
- Trained **Azure OpenAI** chatbot to generate automated scripts, saving over **40**% development time.

Software Developer Intern — May 2023 – August 2023
Ontario Public Service — *Toronto, ON*

- Developed 4+ **GoLang REST APIs** using SQLx with prepared statements, preventing 3+ SQL injection vulnerabilities and cutting load times by **6%**.
- Enhanced the **Vue.js** frontend to AODA accessibility standards, reaching 29 Ontario Ministries.

Software Engineer Intern — May 2022 – May 2023
Loblaw Companies Limited — *Brampton, ON*

- Built a **Spring Boot** microservice in **Java** to calculate GoldenGate replication latency to Oracle via REST APIs and SQL, boosting latency visibility over **30**%.
- Wrote a **Python** script replicating **MySQL**, **MongoDB**, and **Postgres** data to **Oracle**, inserting thousands of records in under 2 seconds.
- Built **CI/CD pipelines** with Docker, **Jenkins**, and **OpenShift**, cutting deployment time by **40**%.

Skills

Languages: Java, Python, JavaScript, SQL, C, C++, C#, HTML, CSS, Bash, GoLang, PHP, TypeScript
Frameworks: Spring Boot, .NET, Node.js, Express.js, React.js, Angular.js, Vue.js, Flask
Tools: Git, Jenkins, Openshift, Powershell, Batch, Selenium, Datadog, GraphQL, Confluence, JIRA, ServiceNow, Splunk, Docker, Kafka, Maven, Apache Camel
Technologies: Kubernetes, OracleDB, MongoDB, MySQL, PostgreSQL, GCP, AWS, Azure
